If Everybody Did It

Think for a moment what would happen if, even for one week, everybody in town were to shop elsewhere—either in a neighboring town or by mail! Would it not cause consternation, and would not all business houses be very much concerned? They certainly would, and with great reason.

Some Do This Regularly

—And what is the result? Every dollar sent to distant business houses is gone for good as far as that particular district is concerned, and merely serves to build up and maintain some distant town. The local business men are robbed of that circulation of money which during its ramblings might help dozens along the way.

How About Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

WANTS IN THE CHRONICLE

R.B. COX ACCIDENT- LY SHOTS SELF

Word was received on Tuesday afternoon about 4.40 p.m., of the death of Robert Basil Cox, a farmer about four miles north west of Carbon. It appears that Cox loaded his shot gun about 4 p.m. and was on his way out to shoot a dog, but had to go through a fence to get to it. He succeeded in crawling between the strands of wire and was dragging the gun after him, when it was accidentally discharged, the shot entering his head just above his eyes and killing him instantly.

Constable Purdy was immediately notified, when one of the men discovered the body, and after investigating the accident, ordered the body brought to Carbon.

The late Mr. Cox was a widower and was 32 years old, his wife having died a little over a year ago, and he leaves to mourn his loss, one daughter, Evelyn, 3 years of age, a cousin, A.N. Cox, living at Cowley, Alberta, and his parents, who are residing in the Old Country.

Funeral services were held from the United Church, Carbon, this morning (Thursday) at 10 a.m., the Rev. C.B. Oakley conducting the service.

The pallbearers were: Messrs. J. O'Rourke, A. McLeod, Chas. Paterson, A.N. Cox, V. Hawkins and J. Shale.

Interment was made in the Carbon cemetery.

FOX FARMING IS GROWING INDUSTRY IN ALBERTA

The number of silver foxes on fox farms in Alberta has doubled during the past year, according to the estimate of H. S. Oulton, inspector for the Canadian National Silver Fox Breeders' Association, who has been looking into conditions in this province. It is the belief of Mr. Oulton that the gross profits from the sale of Alberta-raised fox pelts will be more than \$600,000, in addition to which there will be a considerable profit from the sale of live foxes for breeding purposes.

Last year there were 3,000 registered foxes in Alberta and it is expected there will be 3,000 more for registration this year. There are 76 registered fox ranches in Alberta, on which the stock varies from a few pairs on the smaller places up to 500 pairs on the largest farm, that of Colpitts Bros. near Calgary. Alberta at the present time ranks fourth among the provinces of the Dominion in regard to the size of the fox industry.

LITTLE ITEMS OF LOCAL INTEREST

The fairways on the golf course are now bare and free of long grass and all that is needed to put the course in shape is a little work on the greens and the fixing up of the fences around them.

Frank S. Rouleau, editor and publisher of The Kootenian, Kaslo B. C., arrived in Carbon Sunday evening and spent Monday with us. Dad is just returning from a trip through to Saskatchewan points and he said that the crops there have been greatly damaged by frost and rust and the yield will be small, compared with this province.

Miss Lillian Gordon returned to Staveland on Saturday, after spending a few days visiting with her parents, Mr. and Mrs. W.T. Gordon.

J. A. Connolly and J. N. MacDonald were week-end visitors to Craigmyle.

A decided improvement has been made in the interior appearance of the Farmers' Exchange hall. The walls and ceiling have been painted and a new hardwood floor has been laid.

Alfred Braisher and Victor Gordon left on Monday to attend the Technical school in Calgary.

Frank Seymour was a Calgary visitor the first of the week.

T.R. Olive, Jack Toombs, R.C. Barr and J. Walker motored into Calgary on Tuesday and returned that night.

The Misses Belle, Lottie and Helen Smith went into Calgary on Wednesday and Helen will remain there and again attend Technical School.

Bert. Wright left on Tuesday for Edmonton, where he will again attend the University of Alberta.

Word has been received that Mrs. Babe Pope died in Cookshire Quebec on Friday, Sept. 23rd.

Vic Hawkins motored to Calgary on Wednesday and returned the same day, accompanied by A. N. Cox, of Cowley, Alberta.

Mr. and Mrs. S. F. Torrance were visitors to Drumheller last Friday.

GARLAND GIVES VIEWS ON COAL FREIGHT RATES

E. J. Garland, Progressive member for Bow River riding, has expressed surprise and keen regret at the recent findings of the Railway Commission on the Alberta-Ontario coal freight rates. Having attended every sitting of the Railway Board, and purposely waiting over in Ottawa to assist those engaged in putting forward Alberta's and Ontario's claims for a rate which would permit Alberta coal being shipped to Ontario, the local member says he is at a loss to determine what influenced the commissioners to recommend such a high out-of-pocket rate as \$7.22.

Mr. Garland says the fight is not over by any means. It has but entered another stage, and after the Alberta and Ontario governments come together on a basis upon which they can approach the Dominion government, he feels that the government of Canada will bend

The Conference Of Premiers

At the invitation of the Dominion Government there will assemble at Ottawa early in November a conference of representatives of the Federal Government and of all the Provincial Governments at which consideration will be given to the many questions affecting the interests and rights of the Dominion and its several provinces. This conference will be attended by the Dominion Prime Minister and some of his colleagues and by all nine Provincial Premiers who in each case will be accompanied by cabinet colleagues.

The object of this round table conference is, of course, to discuss problems common to all and endeavor to find satisfactory solutions, to adjust any differences now existing, to try and harmonize conflicting laws, eliminate overlapping in administration, and, in general, to study the financial requirements of the several governmental units. In a word, it is co-operation for the good of all Canada. Its importance, therefore, does not call for any special emphasis.

This conference of Canadian Premiers is designed to accomplish for Canada something similar to what the recent Imperial Conference at London accomplished for the Empire as a whole. For example, the exact status of the Dominion and its several Provinces in regard to certain subjects requires to be clarified. There is now conflict of authority in matters of Company law, incorporation and regulation, including licensing of companies. In insurance matters particularly there is more or less confusion.

Again, most of the Provinces are anxious to exercise strict supervision and control over the sale of stocks and bonds of companies, and several Provincial Legislatures enacted what are termed "blue sky" laws for the protection of the investing public, only to find that all companies had to do to escape Provincial jurisdiction was to become incorporated under Dominion law. The Provinces desire Federal action to overcome this difficulty.

Another matter which is causing adverse comment throughout the country is the duplication of police forces, with consequent division of authority, sometimes leading to over-lapping and consequent friction; sometimes resulting in lack of co-operation. In any event, people feel there is an unnecessary waste of the taxpayers' money with Dominion, Provincial and Municipal police. The Premiers' Conference will give consideration to such problems as these.

Then there is the ever-recurring question of the Dominion subsidies paid to the Provinces, and the complications resulting from the fact that some Provinces have control of their natural resources while others have not. As an outcome of the Duncan Report, the Maritime Provinces have been given a new financial arrangement temporarily. To this the other Provinces have not raised any objection, but if a new and permanent arrangement is to be made in the interests of these Provinces, then all the Provinces have a vital interest in the matter.

Furthermore, it is now fairly well recognized that the financial terms originally fixed at the time of Confederation, and as altered from time to time, work out to the advantage of the Dominion and unfairly to the Provinces. That is to say, increased population brings largely increased revenues to the Dominion through Customs, Excise, and other forms of taxation, but to the Provinces increased population means enormously increased expenditures for education, roads, hospitals, court houses, and institutions of various kinds, while the small increase in the subsidies received from Ottawa because of such larger population is a mere bagatelle compared with such expenditures. Re-adjustment of the financial terms, therefore, becomes a necessity from time to time.

No one thing is more apt to weaken Confederation than the existence of a feeling that it is not working out quite fairly to the Provinces, or that, in regard to those matters which are subject to both Dominion and Provincial jurisdiction, Federal Departments are not displaying that spirit of helpful co-operation which is essential to complete efficiency in Provincial administration. On the other hand, real unity in effort, frank recognition and understanding of each other's problems, and sympathetic consideration and action will make the Dominion united and strong.

The people of Canada will entertain high hopes that the Ottawa Conference will be as successful in its field as the Imperial Conference was in the larger arena of Empire affairs.

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoacetic-acidester of Salicylic Acid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Penetrates Far North

University Graduate Prepares For Expedition Into Arctic Circle

Paddling 1,300 miles alone through the regions of Northwest Canada with only Indians, Hudson's Bay Company trappers, and hordes of animals to punctuate the monotony. Cornelius Osgood, 21-year-old graduate student in anthropology at the University of Chicago, spent the summer steeping himself in the lore of the North woods and learning to live the life of the Indians, preparing himself for a 14-months expedition next year into the Arctic Circle to report on the culture of the little known Athabasca Indians. Osgood has just returned to the university to continue his studies in ethnology.

One Drop of "Putnam's" —Corns Stop Aching

Isn't it wonderful — Just a drop or two of Putnam's on any sore corn and out comes all the pain. After a few applications the corn shrivels up and drops off. No scar, no pain, no pinching from tight shoes anymore. You can dance or walk in comfort. Be sure you use only Putnam's Corn Extractor. Satisfaction guaranteed. Sold by druggists everywhere. Refuse a substitute for Putnam's—it's the best.

Aviation In Canada

No country provides a better field for air communication than Canada. The distances between the cities are great and the climate is favorable for flying. Experience shows that with suitable equipment, winter presents no insuperable obstacle to the continuous operation of air routes.

BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple fevers, and making teething easier. Concerning them, Mrs. Saluste Pelletier, St. Dumas, Que., writes:—"I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Losses From Smut

Smut diseases cause heavy losses wherever cereal crops are grown. In Canada careful estimates of smut losses are available only for the last few years, and these show the average annual loss to the Canadian farmer from this source as over \$12,500,000. Government departments, agricultural colleges, and technical agriculturists are all engaged in the effort to reduce this loss.

Externally or Internally, It Is Good.

When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

Antarctic Expedition

Expedition To Extreme Southern Seas Returns To England

After two years of scientific research in the extreme southern seas, Captain Robert F. Scott's old Antarctic ship, Discovery, returned to Falmouth, England, having suffered no casualties in the struggles with the ice fields.

The expedition gathered valuable information, especially about the life habits of whale. Dr. Stanley Kemp, the leading scientist aboard, told newspapermen that on the disputed marital habit of whales, they are not monogamous. On the contrary, he declared, they have, so to speak, "a wife in every port."

The heaviest wood is lignum-vitae, which runs from 73 to 82 pounds a cubic foot. Ebony is a close second, with from 69 to 83 pounds; boxwood is third, running from 59 to 72 pounds a cubic foot.

Flight Will Be Hazardous

Commander Byrd's Trip To Antarctic More Dangerous Than Any Yet Attempted

Commander Richard Byrd, who recently flew the Atlantic ocean with passengers, will undertake the most hazardous flight that has ever been made by an airman when he will attempt to reach the South Pole by aeroplane. He has already crossed the North Pole by air, but the task he has now set out to accomplish entails even greater dangers and difficulties.

For instance, he may find himself obliged to winter in the Antarctic in the event of being caught in the ice. But if all goes well, and as now planned, the flight will have been accomplished and the intrepid voyagers on their way back to civilization early in 1928.

"If all goes well" . . . These words are often on the lips of Byrd and his companions just now, for well they know, from all the data to hand, that usually all does not go well on that vast but little explored waste, which has been so vividly named "The Home of the Blizzard."

The first aeroplane to fly across this unknown huge vastness of the earth's surface will be equipped with a powerful wireless and with kite aerials that can be flown high in the air to give greater power, so that in the event of a forced landing or other untoward event the fliers will be able at once to communicate with the companions left at the base camp at Ross Bay. They will have the means ready to effect Commander Byrd's rescue.

Diarrhoea Summer Complaint HE ALWAYS USES

Mr. T. F. McGregor, McLennan, Alta., writes:—"Over forty years ago my mother used to give us Dr. Fowler's Extract of Wild Strawberry for diarrhoea and summer complaint. All through the years since then when troubled with an excessive looseness of the bowels I have been accustomed to take a few doses of the same old, reliable remedy and it always seems to have the desired effect, no matter what the cause."

Don't Accept a Substitute

This valuable preparation has been on the market for the past 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Fresh water can be dipped from the Atlantic Ocean for a distance of 50 or more miles off the coast of Brazil. This is due to the enormous amount of water that pours from the mouth of the Amazon.

For 100 bushels of wheat—

That's about all the trip costs, and that's why thousands of people go to the Old Country for the Holidays—an unforgettable pleasure. Are you going?

Fires From Hot Ashes

A fire, which might have caused considerable damage, was noticed on Monday night at the fence of the Farmers' Exchange store, just between the hotel and the warehouse. Someone had dumped red hot ashes near the fence and a slight breeze fanned the coals until a blaze soon started on the fence. Fortunately, it was noticed in time and a few pails of water soon put the fire out. This ought to be a warning to every one in Carbon, especially when we have no fire brigade to properly handle any fire situation which might occur. Ashes of any kind must be kept away from anything that will burn, for one never knows when they contain hot coals. This is just one instance where fires have been started by hot ashes and all must take warning and not dump the ashes from their stoves anywhere, but in their ash cans, or out in the open.

"Your husband, madam, is suffering from voluntary inertia," said the doctor.

"Poor dear! And I accused him all along of being lazy."

This does not refer to Bill Reid.

Custom endures and people still call the up-and-down part of the skirt the "length."

She fell into his arms and he was very busy for a few moments; but the tears flowed on.

"Will nothing stop them?" he asked, breathlessly.

"No," she murmured. "It's hay fever, but go on with the treatment."

Here and There

The west will require 25,000 men from Eastern Canada to assist in gathering the grain crop this year. In all about 67,000 men will be required to complete the work. Arrangements have been made by both railroads to handle the harvesters.

T. O. F. Herzer, manager of the Canada Colonization Association, states that this organization has placed 400 Old Country families in the Prairie Provinces this year and that 800 other families will arrive before the end of the year.

The fourth annual ride of the Trail Riders of the Canadian Rockies, an organization with a membership including many prominent artists, writers and society leaders in all parts of Canada, U.S. and Europe, left recently from Banff over a new trail for Mount Assiniboine.

A shipment of 1,400 horses purchased in the Prairie Provinces for the Russian Government moved to Quebec over Canadian Pacific lines recently. In addition to the 27 carloads already moved to the east a special train of 17 cars passed through this city en route to the Atlantic coast. The horses in the latter shipment were all purchased at Alberta points.

AN EDITORIAL NIGHTMARE

Last night I was talking
With an editor, aged and grey,
When he told me of a dream he had
I think it was Christmas day.
While snoozing in his sanctum
This vision came to view,
For he saw an angel enter,
Dressed in garments white and new.

Said the Angel "I'm from Heaven,
The Lord just sent me down
To bring you up to glory
And put on your golden crown.
You've been a friend to everyone
And worked hard night and day;
You've carried many on your subscription book

And from few received your pay.
So we want you up in glory,
For you have labored hard,
And the good Lord is preparing
Your eternal just reward."
Then the Angel and the editor
Started up toward Glory's gate,
But when passing close to Hades
The Angel murmured, "wait—
I've a place I wish to show you—
It's the hottest place in hell,
Where the ones who never paid you

In torment forever dwell."
And behold the editor saw there
His old patrons by the score,
And grabbing up a chair and fan,
He wished for nothing more.
He just wished to sit and watch them

As they sizzle, singe and burn;
And his eye would rest on debtors,
Whichever way he'd turn.

Said the Angel, "Come on editor,
There are pearly gates to see;"
But the editor only murmured,
"This is heaven enough for me."

Members of the newly-appointed Saint John Board of Harbor Commissioners visited in Montreal recently to confer with officials of the Canadian Pacific regarding needed changes and improvements in the harbor facilities of Saint John. Several suggestions advanced by the railway company will be acted upon before the winter traffic begins, according to the Hon. W. E. Foster, president of the Commission.

Making the Canadian Dollar Go Farther than Ever Before

IN the purchase of the common commodities of life, the Canadian dollar has decreased in value during the past decade.

But, in the purchase of an automobile, the dollar is now worth one hundred to two hundred per cent more than it was seven to ten years ago—is worth more, in fact, than ever before in history.

While constantly raising the quality standard of its products, General Motors of Canada has

increased the purchasing power of the Canadian car-buyer's dollar. . . .

. . . by the economies of volume purchasing and production,

. . . by the close co-ordination of resources and facilities,

. . . by improved labor- and time-saving methods of manufacture,

. . . by sharing with Canada the savings effected by increased production.

In quality and in value, the Canadian dollar now goes farther than ever before in the purchase of a General Motors car.

WORLD HAPPENINGS BRIEFLY TOLD

A statement issued by the Commonwealth statistician shows the population of Australia to be more than 6,000,000, as compared with 2,250,000 in 1881.

The next regular conference of the International Wheat Pool will be held in Regina on June 6 to 8, 1928. It was decided by the committee of arrangements in Minneapolis.

Permission to give religious instruction to students of the provincial normal school outside of lecture hours is being sought from the Department of Education of Alberta by various religious bodies in Calgary.

Monday, November 7, will be observed as Armistice Day and Thanksgiving Day throughout Canada. A proclamation to this effect appears in the current issue of the Canada Gazette.

Col. J. G. Rattray, Winnipeg, Man., former head of the Manitoba Provincial Police, has been appointed head of the Soldiers' Settlement Board, filling the vacancy caused by the resignation of Major J. Barnett.

Towed several hundred feet under water clinging to an anchor, and then struck on the head by swiveling gear as he was finally being pulled aboard his ship, E. K. Kapper, second mate of the halibut steamer New England, still survived.

For the first time in the history of the Upper Great Lakes, corn from the Argentine is passing through Owen Sound's grain elevator for distribution to Western Ontario. Forty thousand bushels have arrived from Montreal. The low price of the South American grain in comparison with United States produce was the cause of its large sale.

An Everyday Story

Francis Henry Cook

London, Ont.—"I was in a general run-down state of health. I had indigestion and my stomach was weak and so sore I could not bear to touch it. I got where I did not have any health at all, was not able to follow my usual line of work. I saw where Dr. Pierce's Golden Medical Discovery was recommended for stomach trouble so I decided to try it and it relieved me of my indigestion and weak stomach, also the abdominal distress and built me up in health. I can highly recommend the 'Golden Medical Discovery' to anyone who suffers as I did. It is excellent!"—Francis Henry Cook, 471 Elizabeth St.

All dealers. Extra large bottles, liquid \$1.35; Tablets \$1.35 and 65c. Write Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., for free advice.

W. N. U. 1791

Conditions Have Not Changed

Airmen Were Warned 66 Years Ago To Be Wary Of Ocean Flight

The difficulties in the path of a westward flight from Europe to the United States were emphasized 66 years ago by Professor Joseph Henry, famous physicist and first secretary of the Smithsonian Institute, in a letter to Thaddeus S. C. Lowe, inventor and aeronautical engineer.

A copy of that letter has just been unearthed in the archives of the Smithsonian Institute. What Professor Henry said in 1861 relative to trans-Atlantic wind conditions is regarded by meteorologists and aviation experts here as having a pointed bearing on some of the conditions faced in recent attempts to fly between Europe and America.

Lowe at that time was occupied with a scheme to fly from America to Europe in a balloon—the largest which had ever been built. Not only did he spend much money on the venture but he had the support of eminent Philadelphians including George W. Childs, John C. Cresson, J. B. Lippincott, William Hamilton and others who contributed several thousand dollars to further Lowe's efforts to demonstrate the feasibility of trans-Atlantic air navigation.

In December, 1860, sixteen eminent Philadelphians, including those named, petitioned the Smithsonian regents to furnish him aid and advice. The regents decided they could not make an appropriation from the Smithsonian fund for the Lowe venture but directed Professor Henry to give Lowe any advice he might "deem fit as to his experiments."

Professor Henry told Lowe that a balloon of sufficient size, properly constructed so as to maintain high elevation for sufficient length of time, would be wafted across the Atlantic, because between 30 and 60 degrees north latitude, the prevailing wind currents were from the United States toward Europe, but he advised Lowe not to try the experiment over the ocean first.

Professor Henry said that the prevalent wind was westerly all the way around the world, and that packet ships in the sixties from New York to Great Britain "occupy nearly double the time in returning that they do in going."

The better the quality of the tea you use the more important it is that the container should be the very best. By careful tests it has been proven that Aluminum is the best container yet found for tea—and Red Rose Tea is packed only in Aluminum—the finest package ever used for tea.

Ex-Kaiser Predicts

More Terrible War

Still Asserts He Could Show World the Way To Peace

Former Kaiser Wilhelm foresees another war in 1937, he told a correspondent of the Copenhagen "Dagens Nyheder" in an interview in which he asserted he could show the world the road to peace.

Wilhelm evidently has slight regard for the League of Nations, which he says is either blind or blindfolded. The League delegates, he compares with children riding wild horses—they might be thrown off the next moment.

"I am even certain that many of those powers talking about disarmament do so in order to inspire greater confidence, thus disguising their purposes" said the former Emperor. "According to my opinion, we shall go through another and more awful war at the latest in 1937, a war which will last only a few days and possibly only a few hours."

"In the same moment that war is proclaimed giant fleets of airplanes, airships and U-boats will be informed by wireless. Merchantmen will be destroyed immediately and a nation unprepared for it will be exterminated within forty-eight hours. On land and sea new and pernicious gas and explosives unknown in Germany will be employed and annihilate the weaker nations within a moment."

The former Kaiser maintains that he is surrounded by spies with orders to prevent him from "endangering the world," and regrets being unable to return as a sovereign to teach the world how permanent peace might be secured.

"But as things now are there will always be wars," Wilhelm concluded. "I could show the road to peace, but the world prefers regarding me as a scapegoat to consulting me as an adviser."

Opening To Be Delayed

Saskatchewan Legislature Will Open Early In the New Year

The session of the Saskatchewan Legislature will not be held before but as soon after the New Year as possible. A statement to this effect was made by Premier J. G. Gardiner.

The fact that the season is so late and that there is a conference to be held of provincial prime ministers in Ottawa in November are understood to be the reasons for deciding not to open the Legislature before the New Year.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

The lowest temperature ever recorded in the civilized world was at Verkhoyansk, Siberia, in 1885, when the thermometer touched 99.4 degrees below zero.

Hollowy's Corn Remover takes the corn out by the roots. Try it and prove it.

Lots of people seem to go to church for the purpose of picking flaws in the sermon.

SUNDAY SCHOOL LESSON

OCTOBER 9

ELIJAH HEARS GOD'S VOICE

Golden Text: "Wait for Jehovah; be strong and let thy heart take courage."—Psalm 27:14.

Lesson: 1 Kings 19.

Devotional Reading: Psalm 57:1-5.

Explanations and Comments

I. The Despondent Prophet, verses 9, 10.—Elijah's reaction after his great exaltation was most natural, as every one must realize from his own experience. The ebb follows the high tide; depression succeeds exaltation. The fire died down within Elijah's soul, the situation in Israel seeming hopeless. He sought a cave on Mount Horeb, and there was made aware of God's "listening ear and sympathizing heart." There is nothing unreal in his meeting there with God, for "the prophet's own soul, inspired by the God within him, shaped it in his imagination." While meditating there he was brought to face the question of his own motive in withdrawing to the wilderness: "What does thou here, Elijah?" Should he answer that he had run away from Jezebel? That he was utterly discouraged, and had perhaps purposed giving up his work on the mount which he thought of as especially "the mount of God?"

"The first step in waiting upon God is always self-examination, the uncovering of our inmost heart, the laying ourselves naked before God's eyes. His Spirit cannot breathe itself into us while we are preoccupied with motives of our own. The soul must first be swept clear by confession. What doest thou hear, Elijah? Examine yourself; review your life; face the facts, facts without and facts within; know yourself; and then when all subterfuge, all subtle hypocrisy, all self-deception is done away, the ear may at length be open to hear the voice, not of your own will, but of God's."

Elijah could honestly answer that he had been very jealous for Jehovah, the God of hosts. Our words jealous and zeal are of kindred origin, and may be traced back to the Greek word which means boiling. To be jealous for some one is to be burning with zeal for that one's interests. Elijah's whole life was marked by his zeal for God. The necessity for his zeal lay in the fact which is next related, that the children of Israel had forsaken God's covenant, had thrown down his altars and slain His prophets with the sword. He thought that all hope of reformation of the people was lost, for the prophets were the only ones who could bring about a change for the better. "And I, even I only, am left," he wailed; "among the faithless, faithful only he," as Milton puts it. Moreover, his life, the life of the only living prophet, was in danger.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Has Fairly Warm Climate

Temperature At Equator Of Mars Over Sixty Degrees

Not many years ago it was thought that the temperature of Mars was too low to support life. But by an ingenious device for measuring the temperature of the planet, it has been found that even in the Polar regions the temperature rises to well over freezing point. The temperature at the equator of Mars is almost that of a clear sunny spring day on earth in the latitude of New York, or between 60 and 70 degrees Fahrenheit.

Photographs taken in infra-red, yellow, and ultra-violet light seem to show that the planet has an atmosphere of considerable depth, though much rarer than that of the earth. Other observations show that the density of the surface atmosphere of Mars cannot be greater than it is eleven miles above the surface of our own planet.

While Mars can be observed to advantage by the telescope only in alternate years, and then for only a few months at a time, Jupiter can be observed all the year round, always presenting an interesting subject of study, except for a few weeks when it is too near the sun to be seen to advantage.

Jupiter has many curious light and dark belts that lie parallel to its equator and seem to be formed of denser vapours than their surroundings. The planet is spinning round on its axis once every 9 hours 50 minutes at its equator and every 9 hours 55 minutes in its higher latitudes. Objects at the equator are carried round at the rate of 30,000 miles an hour, or eight miles a second compared with 1,000 miles an hour, at the earth's equator.

VICKS VAPORUB OVER 17 MILLION JARS USED YEARLY

Duty Of Motor Drivers

Whole Thought Should Be Safety For Themselves and Others

The main principle which should be insistently hammered into the heads of all drivers of motor-vehicles is that, besides obedience to the golden rule of "safety first," the obligation which they must fulfil is constant thought for others. It is their duty to the community to drive always in such a way that both in approaching corners and in overtaking other vehicles safety for themselves and other users of the road can be secured with the least possible use both of the horn and the brake. In other words, wherever other vehicles or foot passengers are in question, their pace should be so regulated and so fully under their command that they can in case of need easily bring their car to a standstill. Between safe driving and noiseless driving there is an intimate connection, and it is chiefly forgetfulness or ignorance of this fact that makes so many of those who use the roads a menace and a nuisance to their neighbors.

Fall Colds

Attack them at the beginning Heat and inhale Minard's Rub on throat and chest.

When Making Repairs

If called upon to change a tire or make a minor car repair while on the highway, one should remember to pull entirely off the road. If this is not possible at the place where the difficulty occurs, it is the part of wisdom to drive on for a short distance to find a better spot. Working on the left side of the car, on a well travelled highway is exceptionally dangerous even in the daytime. At night, it may amount to foolhardiness.

Hydro-Electric Power In Canada

By the end of the year 1926 Canada's hydraulic power installation reached a total of 4,556,266 horsepower of which 265,838 horsepower was installed during that year.

A liquid which renders wood fire-proof has been patented by a Norwegian.

The Proven Remedy for HEMORRHOIDS (Piles)

You can positively depend upon Anusol Suppositories as a safe treatment for Hemorrhoids.

These Suppositories are not an experiment. Back of the box you will buy at your druggist is a half a century's record of successful healing. Ask your doctor. He will recommend Anusol Suppositories. He will tell you that there is no safer or better non-surgical remedy for Hemorrhoids (Piles).

Your druggist can supply you. Or write us for one dozen—postpaid for \$1.50. Canadian & Foreign Agency Company, Unity Building, Montreal.

RURAL ROADS ARE PLANNED TO AVOID ACCIDENTS

Niagara Falls, Ont.—Delegates who attended the annual convention of the Canadian Good Roads Association meeting here apparently become imbued with the "safety first" idea, for continually throughout the discussions the speakers veered from their original topic to safety first suggestions.

H. R. Mackenzie, chief field engineer for Saskatchewan, stated that his province was planning its rural roads with the aim of making them accident proof. Mr. Mackenzie stated that the roads were being constructed 24 feet wide, and with ditches at such a gradual slant that an automobile could run into them at a fair speed and still fall to turn turtle or fall on its side.

The annual meeting of the association, held apart from the convention, did not pass without its recognition of the accident situation, several resolutions being adopted supporting the "safety first" campaign.

In touching upon the question of federal aid, the prelude to a resolution pointed out that the Dominion Government had collected upwards of \$175,000,000 in the past ten years which could be traced directly or indirectly to highways. In view of this, the association instructed its executive committee to make every reasonable effort to induce the Federal Government to grant financial assistance to the building of good roads.

The election of officers resulted as follows: President: Hon. P. C. Black, minister of highways, Nova Scotia; first vice-president, Hon. O. L. McPherson, minister of highways, Alberta; second vice-president, Hon. W. H. Sutherland, minister of public works, British Columbia; secretary-treasurer, George A. McNamee, Montreal.

Plan Subways For Montreal

Huge Project Would Provide Subway Lines and Abolish Level Crossings

Montreal.—Initial steps have been taken, it was officially announced, by a group of local interests connected with financial houses in New York to enter into a \$200,000,000 project with the city, province, Federal Government and railway companies to abolish level crossings in Montreal, construct a grand central terminal station and construct underground tram facilities.

The work in view comprises, it was stated, the abolition of all level crossings in and entering the city either by elevating them or putting them underground. The proposition which it is stated is being made to civic, provincial and Federal Governments beside the railway heads, would provide for collaboration of all these bodies in the financial arrangements.

Completes Long Trip

British Aviator Makes Record For Long Distance Solo Flight

Capetown, South Africa.—Lieut. H. H. Bentley, instructor for the South African air force, who left Hendon, England, on September 1, in a light north airplane for Capetown, completed his long solo flight of more than 7,000 miles.

Lieut. Bentley, who made the trip in long hops to prove the feasibility of London-Capetown air communication and to demonstrate the capabilities of a light plane on long distance flights, created what was said here to be world's record for a long distance solo flight.

The aviator, who had hoped to make the trip in 19 days, found 28 necessary for the long trip, some of it over hazardous and deserted country.

Will Endorse Proposal

Toronto.—Toronto women and probably Ontario women generally will support British Columbia's proposal to make women eligible to the Senate of Canada when the proposal is discussed at the meeting of the National Council of Women at Stratford. The Toronto local has strongly endorsed a similar resolution.

W. N. U. 1701

Gypsy Children Ask For Separate School

Pupils In Czecho-Slovakia Fear Those Of Other Tribes

Prague.—School children in the town of Homonna, Czecho-Slovakia, have struck for separate schools because of their instinctive fear that the swarthy juvenile nomads beside whom they sit have cannibalistic instincts.

Striking children have been strongly supported by their parents, who declare their children are in danger of being eaten. Seeing the force of their arguments, the authorities have decided to build a separate school for Gypsy children, which, it is believed, would be the only one of its kind in the world.

The present protest grew from alleged cannibalistic orgies for which 26 gypsies are now awaiting trial. They are said to have confessed to murdering and devouring scores of persons, pleading the times were bad and they could not afford to buy ordinary meat, but that they did not see "anything wrong in eating human flesh."

Aviators Safe After Long Desert Flight

German Plane Delayed By Detour Ordered By Turks

Bagdad, Iraq.—Lieut. Otto Koennecke, pilot of the Germania, whose arrival here cleared up the mystery of his whereabouts since his take-off from Angora, Turkey, said that his delay in reaching this place had been due chiefly to the instructions given him by the Turkish authorities on leaving Angora as the route to be followed.

The German aviator, who is enroute to the U.S. by way of the Orient, said that the instructions involved a wide detour, the Turkish idea being apparently to prevent foreign aviators from flying over certain areas of Turkish territory.

The aviator said that he had halted at Aleppo and then had deferred his departure for Bagdad in order to avoid flying in the hottest part of the day.

Eugene Chen Married

Reported Marriage In Moscow Of Former Nationalist Foreign Minister Of China

London.—The God of Love seems once more to have won out over the God of War in the Chinese Nationalist movement.

The Riga correspondent of the Daily Mail quotes an official Soviet despatch to the effect that Eugene Chen, former Nationalist Foreign Minister, and Mme. Sun Yat Sen, widow of the father of the Nationalist movement, were married in Moscow.

The newspaper reports the couple intend to spend their honeymoon in China by starting a new revolution, and adds that the Third Communist Internationale is financing the activities of the bridal couple.

C.P.R. Earnings

Montreal.—The gross earnings of the Canadian Pacific Railway for August were \$17,258,624, an increase of \$528,460 over the gross earnings during the same month in 1926. The working expenses for the corresponding period, however, showed an increase of \$1,071,687, representing a decrease of \$443,227 in the net profits, compared with August 1926. Net profits for August 1927 were \$2,862,148.11.

Paralysis In Sweden

Stockholm.—The infantile paralysis outbreak reported in various parts of Europe has reached Sweden, cases being reported from two provincial districts. At Marma, a military training field north of Stockholm, a young conscript died from the disease, and in the neighborhood of Oerbro, west of the capital, several children are ill, but none fatally thus far.

New Rule On Alfalfa Seed

Ottawa.—Regulations under the Seeds Act have been amended to prohibit the importation into Canada of alfalfa seed or any mixture of seed containing ten per cent. or more alfalfa seed, unless ten per cent. of the seed in each container is colored red. This action has been taken to discourage the importation of Southern grown alfalfa.

Young Orator

Frederick Hotson of Tavistock, Ont., Canada's champion orator who has just reached home after his prize trip, won in the Canadian oratorical contest. He visited Scotland, England, Belgium, Switzerland and France. He will compete on October 14 in the international oratory contest at Washington.

May Not Attend Parley

Uncertain Whether Premier King Will Go To Continental Congress

Ottawa.—Considerable uncertainty exists as to the likelihood of Premier W. L. Mackenzie King accepting an invitation to attend the sesqui-centennial of the sitting of the Continental Congress in York, Pa.

While the prime minister is at present out of the city, it is intimated that on his return he will be busily engaged in preparations for the conference of provincial premiers to be held here early in November. No decision has yet been reached by Hon. William Phillips, United States Minister to Canada, as to whether he will attend the centennial.

Adopt Novel Method

May Use Gramophone To Teach English In Quebec Schools

Quebec, Que.—Utilization of the gramophone as a new practical method of teaching the English language in schools of the province of Quebec is the recommendation that will be placed before the Catholic committee of the council of public instruction by a sub-committee appointed to consider the question.

This new method has been approved recently by several school commissions and after a demonstration given before the members of the sub-committee it was adopted unanimously.

Preparing Customs Report

Ottawa.—Three more weeks will be required to complete the report which the Royal Commission on customs will present to the Governor-in-Council. The three commissioners are hard at work on the report, which will, it is expected, be voluminous.

Have Reached Agreement

Railways Likely To Allow Hon. Robert Forke To Control Foreign Immigration

Ottawa.—Negotiations recently initiated by Hon. Robert Forke, Minister of Immigration, looking to a curtailment of the influx of foreigners to Canada, if and when this is necessary, are achieving their object, it was stated here.

Recently in Montreal, Mr. Forke conferred with President Beatty of the Canadian Pacific Railway in regard to the existing agreement between the department and the railways respecting continental immigration. The Minister had a conference on the same subject with Sir Henry Thornton, president of the Canadian National.

"I think we are now in agreement," stated Mr. Forke after seeing the C.N.R. He indicated that while the arrangement with the railways is not being re-drafted, the new provision, or undertaking is, that the Minister will have the absolute say as to when, in his judgment, the influx of foreigners shall be stopped or curtailed.

"Meanwhile," said Mr. Forke, "I think that what has occurred will serve as a warning sufficient to avoid the necessity of any arbitrary action."

Would Make Britain Dry

Evangeline Booth Convinced That Prohibition Is Possible In England

London.—Commander Evangeline Booth of the Salvation Army, to whom a welcoming reception was given in a big London hall, is convinced that prohibition is a big possibility for England.

"If I were over here and had the help of Lady Astor, we could bring prohibition into England in no time," she is quoted as saying in an interview.

The Commander, who is making her first visit here since 1920, talked strongly on the benefits which she said prohibition had brought to the United States. "I would say to every country, if you want to be rich introduce prohibition and banish drunkenness and inefficiency."

Progress Is Satisfactory

Minister Of Railways Pleased With Work On Bay Line

Calgary.—Hon. C. A. Dunning, Minister of Railways, expressed his satisfaction with the progress of the work on the Hudson Bay Railway in the course of an interview here. The minister stated it was now in operation as far as mile 350 and the bridge over the Limestone River at that point had been completed.

"I expect within the next few weeks the Canadian National will let the contract for the last section of the railway to Churchill," he said.

In reply to a question as to the prospects of Fort Churchill and the length of the shipping season, Mr. Dunning said they must await Mr. Palmer's final report.

Doctor Made Indian Chief

Another Englishman has left Canada bearing with him the highest title of one of the famous Indian tribes of the Western plains. The title of "Chief Bear Head" was conferred upon Dr. Edward Brown, of the Poultry World, London, England, by Chief Running Antelope of the Sarcee Tribe.

The ceremony took place on the Burns Ranch near Calgary, recently, during the Canadian Pacific western tour of the World Poultry Congress Delegates of which party Dr. Brown was an outstanding member.

The photograph shows Dr. Brown shaking hands with Chief Running Antelope after he was accepted as a member of the Sarcee Tribe.

WANT CANADIAN CO-OPERATION ON WATERWAY PLAN

Washington.—Co-operation of Premier Mackenzie King's Government of Canada with the United States for the projection of the Great Lakes-St. Lawrence waterway was predicted by W. L. Harding, president of the Great Lakes-St. Lawrence Tidewater Association, after a call upon President Coolidge. He said he had "heard rumors" that the premier intended to head a commission to seek an agreement with the United States and he believed those to be true.

Harding also declared that he saw no prospect of a loss greater than 5,000,000 bushels of grain to United States Great Lakes shippers as a result of the fixing of an eleven cent rate by the Canadian Railways on grain from Winnipeg to Quebec.

Harding, a former governor of Iowa, said that he saw some lagging in the sentiment for Frank O. Lowden, for president, in his state and that in some sections, particularly the eastern part, Secretary Hoover seemed to be gaining ground for the Republican nomination.

Harding believed that the veto of the McNary-Haugen farm relief bill would not play as important a part in Iowa presidential politics as has been generally predicted.

Russia Planning To Buy Montana Horses

Increased Price In Western Canada Too High Is Report

Quebec.—Canada's second consignment of horses to Soviet Russia is now on the high seas, the Russian steamer Dakabris having left Quebec with 1,100 animals for Leningrad.

Captain Smirnov, in charge of the ship, said before leaving that Russia is looking towards the state of Montana to supply her with horses, due to the action of Western Canadian farmers in raising the price of their animals to \$30 each. Montana and other states are willing to supply the horses at \$12 per head, he said.

The Dakabris will be back here early in November for her third and last trip of the season.

Names Are Perpetuated

Nungesser and Coll Linked Forever In Canadian Place Names

Ottawa.—Nungesser and Coll, who sought to fly the Atlantic and failed, will live forever in the place names of Canada. The topographical survey department of the Interior has issued a new map of the new gold-bearing areas in the vicinity of Woman, Narow and Birch Lakes in northwestern Ontario. On the map, the name Nungesser has been given to a lake and to the river flowing from it into Little Vermilion. The name of Coll, too, has been given to a lake.

As Nungesser and Coll were linked in death, so Lakes Nungesser and Coll are linked by the highway of river and stream.

Predicts Fast Mail

Washington.—Within five years mail from New York will be delivered in London in three days by steamers and aeroplanes, second Assistant Postmaster-General Glover, who has returned from the international mail service conference at Paris, predicted. He said the conference's discussion of trans-Atlantic air mail gave assurance of this service.

Expenditure For Indian Schools

Ottawa.—The amount expended by the Government of Canada on Indian education in the fiscal year 1926 was \$1,918,000. In addition to this certain bands of Indians, whose funds were sufficient to meet the expenditure, contributed \$67,000 for school purposes.

Russia-Polish Pact

Warsaw, Poland.—An agreement on certain points of a pact of non-aggression between Russia and Poland has been reached in recent conversations between Stanislas Patek, Polish minister to Russia, and George Tchitcherin, Russian foreign minister, the ministry of foreign affairs announced today.

Progress In Agricultural Methods Shown By The Adoption Of Labor-Saving Machinery

The outstanding trait of Western Canadian agriculture is its ceaseless progression. Western Canadian farming never stands still but is constantly featuring new developments. The diversity of crops extends; methods of operation are steadily being improved. In particular, the advance in the adoption of mechanical devices and the general utilization of machines to facilitate farming operations and reduce manual effort has been striking. Today, the profession of farming in Western Canada demands not so much physical strength as a practical administrative sense and a working mechanical knowledge. Manual labor requirements are steadily being reduced to a minimum and the Western Canadian farmer is becoming more and more the operator of a machine.

According to report from intelligent observers in Western Canada, the spring revealed two very marked trends in the agricultural industry of that territory, one being the greater powerizing of the large dry land farms and the other a marked increase in the favor and probable utilization of the combined harvester-thresher. Dealers in the territory report an unprecedented demand for the light farm tractor and a tremendous increase in orders for combines. Tractors have been steadily delivered at farms as they were received from the factory, while, according to one estimate, the number of combines used in Alberta and Saskatchewan this fall would be close to one thousand machines as compared with 175 in use last year.

Though combines were tried out in Western Canada as early as 1922, the year 1926 saw the first general practical test of the reaper-thresher in the territory, and the voluminous demand for the machines this year would augur a wide agreement as to their practicability in the area, which leads authorities to anticipate something of a repetition of Kansas history in this respect. The general adoption of this machine would probably be the most revolutionary factor ever introduced into Canadian agriculture. Briefly, it eliminates the operations of bundling, tying, and stacking, and threshes the grain as it goes along. Its possible effect may be judged from the fact that at harvest time the Canadian West finds it necessary to import about 50,000 additional workers, and the number naturally rises with the increase in cultivation.

As one of the world's leading agricultural countries, Canadian methods are extensively adopted and the product of implement manufacturing industry finds its way into nearly every farming country of the globe. This business may be expected to extend to the reaper-thresher in certain directions and further swell a growing trade. The value of farm implements exported from Canada in the last fiscal year reached \$17,412,947, as compared with \$13,628,341 in the previous year, \$11,342,712 in 1924-25, and \$6,878,752 in 1920.

Could Use X-Ray

When police at Birmingham, Ala., descended upon a group of negroes closely grouped around a blanket upon which lay many bills, they thought they were breaking up a dice game. But there were no dice. They searched the men and the room, but found nothing with which gambling might be done. The cases were thrown out of court when the defence attorney demanded that the dice be produced. Afterward a grinning negro approached the lawyer and said, "Boss, I swallowed them dice. We always gets little ones that's easy to swallow."

The Boss: "Is it true that you leave your typewriter and go when the clock strikes five, even if you are in the middle of a word?"

The Stenog: "Certainly not! When it gets as near five as that I never begin a word at all."

Auto salesmen in the state of Washington are forbidden to refer to the speed of their cars in advertisements. This law has been passed with the hope it would decrease reckless driving.

W. N. A. 1761

Profit In Sheep

Sheep Raising As A Side Line On The Prairies

Although the farmers of the prairie provinces will probably continue indefinitely to depend upon grain growing as their main source of revenue there are several lines of work which fit in admirably with grain growing and provide an extra source of revenue. One of the best of these sidelines for the prairies, according to E. Van Nieu of the Scott, Saskatchewan, Experimental Station, is sheep raising. Many farmers are realizing this and the number of sheep in the three provinces is increasing. They prove particularly helpful to the income when the main crop is found wanting on account of seasonal conditions. The two sources of revenue from sheep, namely, wool and lambs make the proposition doubly attractive.

Sheep are useful as a channel for marketing low grade whole grain and for cleaning stubble fields. They appreciate a varied ration, however, and in districts where alfalfa or clover hay is plentiful these should be used as roughage for the breeding stock in conjunction with straw, but good results have been attained at Scott when oat straw was the only roughage fed. Probably the most satisfactory method of getting a start with sheep is to purchase a few grade ewes and use pure-bred rams. If the farmer has had no experience with sheep he should start with a small number.

Winnipeg Newspaper Union

A Frock Of Youthful Charm

Of girlish simplicity is the chic frock shown here. In View A the scalloped skirt is attractively embroidered, and is shirred at the top to the bodice having a centre front closing, a V neck, long dart-fitted sleeves, and scalloped collar and cuffs, while View B shows the same frock with the sleeves and collar omitted, and having a chic bow of ribbon at the back of the V neck, and wide lace in place of the scallops around the lower edge. No. 1578 is for misses and small women, and is in sizes 16, 18, and 20 years. Size 18 (36 bust) requires 3 3/4 yards 39-inch, or 2 1/2 yards 54-inch material, and 1/2 yard 39-inch contrasting for View A, while View B requires 2 1/4 yards 39-inch material, and 2 1/4 yards 4 1/2-inch lace. Price 20 cents the pattern.

Transfer Design No. 1142 is used to trim View A. Blue and Yellow. Price 25 cents the pattern.

Developing New Grain

"Mystery Wheat" Ripens Fortnight Earlier And Yields Equals Marquis

In his first statement on his "mystery wheat" which he is developing on his farm near Wembley, Alberta, Herman Trelle, world wheat and oats king, reveals the new grain is being especially developed for harvesting by combines.

These are features of mystery wheat: The straw stands stiff even under light snow; the head does not shatter; it retains the kernels in a fast grip, even under adverse weather conditions.

The grain ripens a fortnight earlier, enabling it to stand in the field until dead ripe, without damage from frosts, thus providing ideal grain for simultaneous cutting and threshing. The yield and quality equals that of the Marquis variety.

Trelle is still developing the new wheat but hopes by the end of next season to have it accepted officially so that farmers all over the West may start growing it.

Progressive Canadian Eskimos

Rapidly Adopting the Ways Of Civilized Life

Canadian Eskimos are progressive people. The more advanced have, in their homes, sewing machines, gramophones and radio outfits. In the Mackenzie delta and along the Arctic coast the ambition of the head of the family is to own a schooner fitted with an auxiliary gasoline engine, and the high price of Arctic furs has enabled a good many to attain this objective. At Aklayik, a trading village, mission station, and police post on one of the islands of the delta, as many as twenty-five of these schooners, all owned by natives are frequently to be seen at one time.

Prairie Provinces Are Making More Butter

Account For About Thirty Per Cent. Of Canada's Output

Every one of the provinces records an increase in butter production last year, Manitoba having the largest proportionate increase. A striking feature of the survey, in fact, is the position in butter production which the Prairie Provinces have come to occupy. These provinces, Alberta, Saskatchewan and Manitoba, which a comparatively short while ago did not provide enough for their own requirements, now rank third, fourth and fifth respectively, and together account for nearly 30 per cent. of the Dominion butter output.

Jokes on marriage are funny only to those who are not married.

American Legionnaires to France

Sixty members of the "Boys of '76" Bugle and Drum Corps of Post 76, Racine, Wisconsin, part of the American Legion, who sailed from Quebec recently to attend the national convention in Paris. Attired in white uniforms and steel helmets, and accompanied by brilliantly garbed drum majors, they presented a very handsome spectacle as they assembled to embark on the Canadian Pacific steamship Montroyal for Antwerp. This corps is a part of what was considered the most stupendous trans-Atlantic peace-time movement in history since the first sailings of the Canadian Pacific steamers for this purpose began August 26. The Legionnaires were welcomed for the convention September 19-24, by Premier Poincare, President of the Republic, and many prominent political and military leaders in France. Among outstanding Americans to sail were General John Pershing, who accompanied the American Expeditionary Force to France, and U.S. Ambassador Myron T. Herrick.

It is estimated that well over 17,000 Legionnaires sailed from America to attend the convention.

Few Fields Left To Conquer As Out-of-the-Way Parts Of The Earth Are Mapped By Explorers

English Is Common Speech Of Millions Taught To School Children Of Almost Every Civilized Country

At a recent meeting of the Royal Society of Literature, attended by prominent literary men of Great Britain and the United States, the use and misuses of certain English words and national differences of pronunciation were discussed. One outcome was the decision to take steps to form an "International Council for English." This council would consist of fifty British members and fifty members from the United States. It would investigate disputed usages of words and study "Americanisms and Anglicisms."

The proposal that an international council for English be formed directs attention once again to the spread of the use of that tongue throughout the world. The various dialects of Chinese are spoken, indeed, by more people than is English. On the other hand the written language of the Chinese is so difficult to master that learned men in that country have been striving to simplify it. Spanish is the tongue of an increasing population in South American states. Russian is the language of about 150,000,000 people. English has been carried by settlers to North America, Australasia and Africa. It has long been the language of a world-wide commerce. In 1801, according to a British statistician English was spoken by only twenty-one millions of people. By 1850 it was the native tongue of one hundred and eleven millions. Today it is the common speech of one hundred and seventy millions. It will be spoken by more and more people as the populations of the British Empire and of the United States increase. Furthermore, it is being taught to children in the schools of almost every civilized country in the world. It is growing more and more into use as an international language.

Watch 100 Years Old

Miss Cynthia A. Pintler, White Lake, N.Y., has had her grandfather's watch wound for the first time in 100 years. The watch, which was made in London in 1771, belonged to Peter Pintler, and becoming out of order, remained unused for the century. Miss Pintler had it put in good condition and deposited it in a bank.

Only three-quarters of a century ago large tracts of the earth were completely unknown, the whole interior of the African continent was a blank on the map and in the opinion of many, probably, a prolongation of the sandy waste of the Sahara. Both Polar regions were unvisited, little or nothing had been ascertained regarding the regions of equatorial South America and the central parts of Asia and Australia. Yet in 1912 geographical authorities were able to say that the unknown no longer existed and that the world had attained almost complete self-consciousness. That qualifying word almost doubtless applied to the yet unvisited portion of the Polar regions and of the interior of Brazil. Beginning with the first great exploratory journey of David Livingstone in 1853-56, continual inroads on the unknown have reduced the blank areas on the map until few fields are left for the adventurous to conquer.

Of all that remains, the most provocative challenge comes from the huge continent that surrounds the South Pole, with an area only a little less than that of the United States. Rising to an elevation of two miles above the sea with "barrier bulwarks" of precipitous ice cliffs, and seaward more "guardian packs" of floating ice, the South Polar continent long offered almost insuperable obstacles to explorers in ship or by land. To surmount them by aeroplane is easy, but then come dangers of another kind. The Antarctic has been called by one explorer, who spoke out of the fullness of personal experience, as Jotunheim, "the home of the blizzard," where the temperature falls to 50 degrees below zero. These blizzards exacted their toll of death when Captain Robert E. Scott and the other three survivors of his successful Polar expedition perished in March, 1912, from exposure and starvation.

Commander Byrd's proposed flight to the South Pole and back, now planned for the southern summer of next year, will be the most difficult and perilous of all Polar ventures, even more so than those undertaken in quest of that more alluring goal of the centuries, the North Pole. But the greater the hardship and peril of the quest, the stronger is its appeal to men of adventurous temper and the urge will remain till it is satisfied. In the case of the Antarctic, the lure is heightened by the report of vague mineral possibilities. This will ultimately attract the prospector, as it has done in the Arctic. In the meantime, the Antarctic holds the attraction always attaching to mystery.

English Insects Recruited

New Zealand Has Appealed For Aid To Control Weed Menace

An expeditionary force of insects will be sent soon from England to New Zealand. The Dominion has appealed for aid against the gooseberry and blackberry brambles and ragwort weed which has spread too rapidly.

At the experimental station at Harpenden, Herefordshire, armies of English beetles and caterpillars are undergoing elimination tests to determine which bugs have the most voracious appetite for weeds and do not include vegetables and fruits in their diet.

When the insect "shock troops" are picked they will be rushed to New Zealand and turned loose against the farmers' enemies.

Wintering Steers Loose In Pens

To determine the relative merits of housing steers for winter feeding loose in large pens or tied in the stable a test has been conducted during the last three years at the Lennoxville, Quebec, Experimental Station. The results of the test show quite conclusively that larger gains can be obtained at a cheaper cost by feeding the steers loose in pens. Especially when the cost of labor and equipment is taken into consideration there is a marked advantage in wintering steers in this way.

Prospective Buyer—"How does the land lie out here?"

Suburbanite—"It isn't the land. It's the agents."

"How do you keep your shoes always looking like new, in spite of all the dancing you do?"

"Simple!—Never any 'cracking under the strain' when I look after them with 'Nugget'."

"NUGGET" SHOE POLISH

There's a "Nugget" shade for every shoe made.

PAINTED FIRES

CHAPTER VIII.—Continued

Mr. Wymuth who backed up his wife's petitions by hollow groans and exclamations of "Lord, save" and "God, have mercy!" was called to the telephone just at the moment that she was warming up to the real business of her report.

"O Lord, send down Thy chastening fire to convict and convert."

"Amen! Hallelujah!" shouted the girls, knowing what was expected of them.

Helmi, who was kneeling just behind Mrs. Wymuth, caught a glimpse of keys in the pocket of her black sateen apron. A sudden impulse prompting her, she cautiously abstracted the keys and crept quietly backward from the room. In the general excitement of the evening devotions she was not missed.

Helmi went at once to the retreat, found the key which fitted, and then to the desk. She had been trusted to sweep and dust this hallowed spot, and so knew that one sacred drawer was always kept locked. It yielded to the right key, disclosing a pile of letters. Helmi found three for herself and one for Minnie. She hurriedly replaced the others, shoved her own and Minnie's into the front of her dress, and made the perilous journey down the long hall. If she had only told Minnie to keep on praying. Her heels seemed to suck at the linoleum, her knees cracked, the house seemed to scream with silence. Mr. Wymuth was still at the phone. She reached the door. They were still on their knees, Mrs. Wymuth keeping up her supplications to the throne of grace. Some of the girls were crying. Helmi was on her knees in a moment beside them, and into her grateful heart there came an honest sigh of thanksgiving. Mrs. Wymuth, hearing it, redoubled her efforts—she would get Helmi yet.

"Oh, Lord, give us souls for our hire—unlock the stubborn door—break down the bars of silence;—O,

DRAGGING-DOWN PAINS RELIEVED

Woman Suffered Nearly a Year. Lydia E. Pinkham's Vegetable Compound Brought Her Health.

Moose Jaw, Sask.—"I am going to try to tell you what Lydia E. Pinkham's Vegetable Compound has done for me. I suffered very badly with dragging-down pains and inflammation, also pains in my right side over my hip and down my whole side into my leg. I had it nearly a year when I went to a doctor and he said I would have to have an operation. But my mother said to take Lydia E. Pinkham's Vegetable Compound as it saved her life years before. I took two bottles and I found I was better, so I kept on taking it and also used Lydia E. Pinkham's Sanative Wash. I have had two more children since then and am perfectly well. I used to have to lie down two or three times a day, and now I do all my housework without trouble. I always keep the Vegetable Compound in the house as I find a dose now and then helps me. I am willing for you to use this letter any way you see fit and I will answer letters. If I can help any other woman I'd be only too glad to try."

—Mrs. ESTHER HOUGHTON, 414 Morse Square, Moose Jaw, Saskatchewan.

Lydia E. Pinkham's Vegetable Compound is a dependable medicine for all women.

For sale by druggists everywhere. C

W. N. U. 1701

Lord, we are waiting, waiting, waiting."

Helmi swayed nearer to her and gently replaced the keys in Mrs. Wymuth's pocket, falling back on her knees in a rapture of thanksgiving and relief. And in the general responsive outcries of the girls Helmi, too, joined. But the words of her song were the words of one of the yells of the

"Merry Maids!"

"Skin a mir inka! Skin a mir inka! Skin a mir inka doo! I love you!"

Fortunately for Helmi, Mrs. Wymuth attributed her strange words to her foreign birth, and in her joy at Helmi's apparent surrender she did not inquire closely into the matter. Helmi's silence was broken! Now for the full confession,—the stubborn will had yielded at last.

The other girls were sent into the common room, where they began their dreary task of making baby clothes in shamed silence. Although the Wymuths had been at the home only a short time they had killed every spark of happiness in it. Mrs. Avery had imbued the girls with a certain gaiety and enthusiasm over their sewing which had lifted it out of all sadness. A baby was to her a sacred gift; it must be made welcome! and baby clothes must be beautiful. The girls loved the two hours after supper when the little garments were fashioned. Indeed, the beautiful things that Mrs. Avery had planned and the girls had made were used against her by members of the Board, who claimed that she encouraged the girls to forget that they were sinners, and had them actually looking forward to the coming of their babies, forgetting that they were children of shame.

The Wymuths let the girls forget nothing, and on this night they were silent and sad, as bitterly cast down and ashamed, as any Christian Board could wish!

For an hour Mr. and Mrs. Wymuth struggled with Helmi. They prayed coaxed, threatened. She must tell! Mr. Wymuth at last shook her roughly—he had often said this was the best way to deal with foreigners. They had to be mastered.

Something broke in Helmi then. The nervous excitement of the evening—her three precious letters that she had not yet opened—her anxiety for Minnie, and eagerness to know what her letter contained of good or evil—something broke in Helmi's heart with sudden fury. It was that flashing temper for which her countrymen are noted. One moment she had been perfectly calm, tight-lipped, composed, mistress of herself, determined to bear all things; the next moment she was a flaming fury, with murder in her eyes. She hurled Mr. Wymuth from her with a swinging blow that sent him crashing into the china cabinet, and the words she said were words she had not known that she knew. In the hotel in Saint Paul she had heard the clerk say them to a persistent peddler at the door. "You go to Hell!"

Mrs. Wymuth screamed in genuine, honest fright.

CHAPTER IX.

"Girls! Oh, girls!"

Mrs. Wymuth's voice was fraught with terror and brought the girls from the common room in a panic.

"Oh, you wicked, wicked girl, Helmi! You have killed the best man the sun ever shone on! He is bleeding to

death, his life oozing away!" Her voice, which always had a rusty whine, now fairly croaked.

The glass in the door of the cabinet had given Mr. Wymuth a cut in the cheek, and the blood ran over his pale face. Helmi, wide-eyed and rigid, stood as if rooted to the floor.

"Murder! murder! murder!" Mrs. Wymuth's voice was rumbling now like distant thunder. "Oh, speak to me, Mr. Wymuth." Even in her excitement she remembered that it would not do to call him by his first name before the girls—in life or in death, discipline must be preserved. "Speak, oh speak, pale lips!"

The pale lips spoke. Mr. Wymuth's thin veneer had been cracked by Helmi's blow. "Shut up, you fool, and get me something to wipe off the blood," he said.

"He raves," cried his wife dramatically. "Go, girls, go! When he wakes—if he ever does wake in this life—he must see no face but mine bending over him. Go!"

The girls drifted noiselessly up the stairs, deeply awed by what had happened. Helmi suddenly remembered the letters she had concealed, and ran upstairs to find Minnie, who had gone to bed early. When Helmi reached the dormitory she found herself the centre of an admiring throng. "Gosh, I'm glad you patted him!" cried one. "Helmi, ain't you the best girl," said another.

"Serves him right, the big bum," was Rose Lamb's contribution. "I wish I had your nerve, Helmi. He walloped me for fair last week, and I was afraid to hit back. But Gee! he hadn't a look in with our husky Helmi!"

Minnie had awakened with the noise and was sitting up in bed, very pale and frightened, when the girls swarmed into the room. Helmi put the letter in her hand.

The first flush of congratulations gave place to dismal forebodings. "Gee, Helmi, I'm glad it was you and not me that walloped him, I'm scared they'll half kill you." This was from Maude, a repeater who seldom spoke. "It's the Board I am scared of. There's a whole room full of them, and we get dressed the night they come—and they ask us questions about are we happy, and we say 'We are very happy here and will try and repay all the kindness you have shown us.'"

"That's not a Board," said a young girl who had been brought in because she and her stepmother could not agree; "Board is what you pay when you eat."

"Shut up, silly! Maude's right. Ain't she been here twice? I guess she would know. I'm afraid they'll kill Helmi, maybe, or do something bad—expel her, maybe."

"That ain't the worst," Rose Lamb let the discussion now. "You can't get expelled from this place. I guess if any one could, it would have been me. This is a jail, really, only it's a jail where they're going to convert you or bust. It's best to get converted first thing. I've been converted lots of times; every time I run away I get converted all over again. Gee! I'm getting fed up with these Wymuths! Ain't this a swell time we're havin' tonight! I'm all for Helmi, —she's as good as a show," Rose began to sing.

(To Be Continued.)

Local Possibilities

Home Neighborhood Usually Offers Better Chances Than Elsewhere

Many folks will start off to some far distant city or state to seek their fortunes when there are equally good or better chances in the home neighborhood. The chance to make good in one's home location is usually better, since people understand local conditions more thoroughly. They also have friends in their home locality who will be of assistance in developing any kind of business. There are opportunities for business everywhere and they are just as good as elsewhere. The people who render superior service and who advertise what they can do will always attract attention and go ahead.

Pearls From Fish Scales

A New York company, one of the largest manufacturers of imitation pearl from fish scales, is erecting a plant at Nanaimo, B.C., to manufacture from the fish scales of the British Columbia catch, and production is set for November.

When love sets the task the laborer never thinks of demanding shorter hours.

Man's "First Alphabet" Denounced As Fake

French Experts Find "Glozel Writings" Are Not Authentic

At a meeting in Paris of the Academy of Inscription the "Glozel Writings" discovered three years ago and believed to be man's "first alphabet" were denounced as fakes. The denunciation was made by Camille Julian, an authority on the Gallo-Roman era, and Rene Dussand, the academician appointed to make a special investigation.

The famous writings, which were brought to light at Glozel, near Vichy, were declared by the finders to be the work of Neolithic man, thus presenting the contention that the writing originated hundreds of centuries before the period generally accepted by scientists.

For some time the authenticity of the inscription was not questioned. There was merely disagreement as to its age. MM. Julian and Dussand now declare they found many good reasons to suspect the "discoveries," citing as examples the objects had been recently disturbed, the lack of human bones, pictures of reindeer, which did not exist in France, and finally that a fee of four francs was being charged for admission to the property where the "find" was made.

Fares Change With Weather

Trans-Atlantic Passenger Rates To Be Lowered During Dull Season

Trans-Atlantic passenger fares in the future will change with the seasons.

Cheaper rates for steamship passage are to prevail during the fall and spring as well as winter. This action of steamship officials has been taken to stimulate business in what are known as the off-seasons.

By the new arrangement, agreed to by all the principal trans-Atlantic companies, there will be three different tariffs, one for summer when travel is at its height, one for the intermediate seasons, the late fall and early spring, and another for mid-winter when travel is lightest.

The reductions on the more luxurious liners, such as the Majestic, Berengeria and Leviathan, in some instances amount to ten to fifteen per cent. from the summer tariff.

Little Helps For This Week

The fruit of the Spirit is love, joy, —Galatians v. 22.

So take joy home, And make a place in thy great heart for her, And give her time to grow, and cherish her. Then will she come, and oft will say to thee When thou art working in the furrows,—ay, Or weeding in the sacred hour of dawn, It is a comely fashion to be glad, Joy is the grace we say to God. —Jean Ingelow.

All God-like things are joyous, they have touched God, and so they carry with them an irresistible gladness everywhere.—Frederick W. Faber.

Angora Rabbit Farms

Reports state that Angora rabbit farming is being carried on to a very large extent by the people of France. Many thousands of Angora rabbit farms are in operation throughout the country and these depend largely on the revenue from the wool taken from the Angora rabbit which brings as much as \$8 a pound for the best grade. In one year, Angora rabbit wool produced in France amounted to \$190,000.

The tourists were being shown the Acropolis at Athens, when one of them, after an enthusiastic "Gee, I'll say it's great!" appeared to miss something.

"Say," she said, "where are the four horsemen, anyway?"

Educating Indian Citizens

The expenditure by the Government of Canada on Indian education in the fiscal year 1925 was \$1,918,000. In addition to this certain bands of Indians, whose funds were sufficient to meet the expenditure, contributed \$67,000 for school purposes.

THIN, WATERY BLOOD ALWAYS DANGEROUS

If Not Corrected Serious Results Sure To Follow

In no trouble is delay or neglect more dangerous than in anaemia—thin, watery blood. It is very common in young girls and in persons who are overworked or confined within doors. It makes its approach in so stealthy a manner that it is often well developed before the trouble is recognized.

But taken in time the tonic treatment through the use of Dr. Williams' Pink Pills, so enriches the blood that good health and strength is speedily regained. The correction of anaemic conditions by Dr. Williams' Pink Pills is as certain as anything can be. Miss Teresa Heafey, Dunraven, Que., is one of the many anaemic sufferers who has found new health through the use of this medicine. She says:—"I cannot express too warmly my thanks for what Dr. Williams' Pink Pills have done for me. I was suffering from a badly run-down condition. I was very nervous, had little desire for food, and would feel tired out at the least exertion. In this condition I began taking Dr. Williams' Pink Pills, and before using them very long found my health gradually improving, and under their continued use was completely restored. For this reason I earnestly advise all weak girls to take these pills, feeling sure that they will do for others what they did for me."

Send your name and address to The Dr. Williams' Medicine Co., Brockville, Ont., and they will mail you free a useful little book on "Building Up the Blood." The pills can be obtained through any druggist or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Perhaps the only way to get around the problem of what is the plural of "gallidius" is to grow asters.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

The average man thinks he isn't even with the world until he owes others as much as they owe him.

Minard's Liniment for Toothache.

So often one reads a best seller and is saddened to think there are so many people capable of liking it.

Fresh Youthful Skin Maintained by Cuticura

There will be a meeting of the
Board of Trade in the Municipal
office on Friday evening, Oct. 8.
at 9.05.

Mr. Stewart, Post Office inspec-
tor, looked over the local office on
Thursday last.

Miss Mildred Craddock left last
Thursday for Calgary and will train
in the Holy Cross Hospital for a
nurse.

Mrs. R. Heath was rushed to
the Holy Cross hospital last Friday
and was immediately operated on
for appendicitis. Latest reports are
that she is getting along splendid-
ly.

He came tripping merrily into
his tiny hall one day, and almost
fell, stumbling upon someone's
rubbers left lying about.

"Whose ferry boats are those in
the hall?" he asked, angrily, when
he entered the drawing room.

"Ferry boats!" exclaimed his
mother-in-law, indignantly. "Why
those are my rubbers. Ferry boats,
indeed!"

"My dear, good ma," he said
hurriedly, "who said ferry boats?
You misunderstood. I said fairy
boats—you know fairy boots!"

And then he went out and wiped
the cold sweat from his brow.

Parent: What are your prospects
if you marry my daughter?

He: Excellent, if I marry your
daughter.

*"I'll tell you why I'm going to
buy a Westinghouse—"*

"Looking back over the past 25 years,
I found less than 20% of all automobile
manufacturers have stood the test of time
and are in business today.

The radio industry is undergoing an
identical process of elimination and I'm
going to buy my radio from a manu-
facturer with many years' experience,
unlimited resources and assured perman-
ence in the business.

Westinghouse built the electrical
apparatus that provides the profits for

our business by keeping our machinery
working year in and year out. They
are pioneers in the
business and have a
wonderful reputation to
maintain. They take
no chances. Our com-
pany doesn't either—
and neither will I—so
you'll hear the latest
Westinghouse model the
next time you come up
to the house."

We will gladly demonstrate the 1928 Westinghouse models
and explain the many improvements that make them better.
